

IEEE Transactions on Terahertz Science and Technology

The expanded version requires new technical content which provides a more in-depth treatment, or demonstrates results beyond the GSMM paper. Submissions will be reviewed to determine if the manuscript includes substantially new technical content beyond the Symposium paper; whether the past work including the Symposium paper is adequately referenced; and whether the new results are placed in proper context with respect to the prior work and existing state-of-the-art. The new technical content could include a more in-depth treatment, or results beyond the Symposium paper, and take advantage of the discussions generated at the Symposium, leading to possibly different results or interpretations. Unlike a Symposium paper that might present preliminary new results, a manuscript submitted to TTST for publication is expected to present more complete results. With the submission, please include a copy of your GSMM paper. Every paper will be reviewed by TTST in the same manner as all other regular submissions to this publication.

IEEE Transactions on Microwave Theory and Techniques

Authors of all papers relevant to topics of interest of T-MTT presented at the 11th Global Symposium on Millimeter Waves are invited to submit an expanded version of their papers to the 5G Hardware and System Technologies Special Issue. The expanded version requires that the new technical content includes a more in-depth treatment, new results beyond the GSMM 2018 paper, or both. The authors should also take advantage of the discussions generated at the GSMM 2018, which may lead to possibly different results or interpretations. Every paper will be reviewed by the T-MTT Editorial Board in the same manner as all other regular submissions to this publication. Therefore, authors of papers presented at the GSMM 2018 are invited to submit a substantially expanded version of their papers to the 5G Hardware and System Technologies Special Issue, no later than October 15, 2018.

The submission is accomplished through the ScholarOne Manuscript Central website (<http://mc.manuscriptcentral.com/tmtt-ieee>), in exactly the same way as any other regular MTT Transactions' submission.

When you prepare your manuscript you should consult the Instructions for Authors (<http://www.mtt.org/author-information-transactions>) and follow the T-MTT Word or LaTeX Templates available there. Papers not following these templates cannot be accepted into the peer review process.

Please be aware that your contribution should be prepared as any other regular T-MTT paper, and that it will be evaluated via the same peer-review process. The quality of your contribution must meet the level required for a publication at the MTT Transactions.

Since your contribution is an expanded version of your conference paper, it is important to note that, according to the instructions for authors, you must meet the following requirement:

“5. You must reference your own work, especially recent journal/conference publications. Discuss your related publications in the introduction and distinguish the new results you present in your current manuscript from those found in your previous publications. While there is not a specific criteria that must be met, such as 60% new technical material, the reviewers are asked to determine if the paper provides "sufficient new technical material to justify a new paper" when compared to all previously published papers. This standard must be met by all papers, including papers that are submitted to conference special issues. Note that longer introductions and lists of references do not qualify as "technical material." It is acceptable to repeat some results to properly explain the concept and to create a self-contained paper for the reader, but this should be done only when necessary. Please attach pdf files of the previous papers.”

Because of the time required for a second review cycle, papers receiving a major revision decision are not guaranteed to be published in the Special Issue, but may be published in a subsequent regular issue if, in the end, the paper is accepted.

In the unlikely event that the referred Special Issue does not have enough accepted papers, it will be canceled and its accepted papers will be scheduled for publication in subsequent regular issues of the MTT Transactions.

Other submission instructions:

- (1) In the pull-down menu for “Manuscript Type”, please select “5G Hardware and System Technologies”.
- (2) Please note that only papers falling in the topics of interest of the MTT Transactions (<http://www.mtt.org/author-information-transactions>) will be considered.
- (3) The conference(s) paper(s) must be included along with the submission as a supplementary file.
- (4) Discuss the expansion over the conference paper(s) in the Introduction (very important).
- (5) The following note should be added to the footnote on the first page of the paper: “This paper is an expanded version from the Conference Name, place, date.”
